1.Introduction

Dear friends!

This year, we present to you the 21st report on the operation of the RAINBOW Crisis Center – CDR and the 10th balance sheet of the work of the Safe Women's House RAINBOW.

In 2025, we celebrated our 20th anniversary, which seems like an incredibly long time to all of us, but in reality, this time has passed incredibly quickly. The product of this time is hundreds of clients and thousands of hours of consultations, as well as a large amount of invested energy on the part of employees and time on the part of volunteers. I can't even name the unit for the help of our financial supporters, sponsors and helping sympathizers. But I can name a great feeling of gratitude and commitment to everyone who stands by us.

It is an incalculable help, without which we would not exist. And certainly not for 20 years.

Thank you very much.

2. About our organization

Name :

Civic Association DOMOV – DÚHA

Address :

Pavlovova 5, 821 08 Bratislava

Tel.:

02/ 4552 3077

0918 824 247

E-mail :

domovduha@domovduha.sk

The civic association DOMOV – DÚHA is a non-profit non-governmental organization, which was established on 9.3.2004 by the registration of the Ministry of the Interior of the Slovak Republic (under No. VVS/1 – 900/90 – 23419).

Its establishment and subsequent establishment of the crisis center was initiated by the Children's Safety Line at SV UNICEF as a need that resulted from the work of the line in distance counseling, the socio-legal counseling center and the outpatient crisis center.

In 2006, the civic association received accreditation from the Ministry of Labour, Social Affairs and Family for its activities - decision no. : 14168/2006 – I/21AK.

As it has been valid for 5 years - in 2011 we applied for its extension - decision no.: 7063/2011-I/25AK, in 2016 we extended the accreditation for the 2nd time - No. 9640/2016-M 0330 DRAK and in 2021 again under number 22913/2021-M_OAK.

Composition of the Civic Association DOMOV - DÚHA:

Chairman	PhDr. Dagmar Povodová
Members of the Board of Directors	Ing. Eva Dzurindová PhDr. Katarína Trlicová
Members of the Control Commission	Ivan Zábojník, MD Ing. Hana Moravčíková
Members	Peadr. Zuzana Forróová Mgr. Pavel Povoda
Honorary Members	PhDr. Eva Havelková Dennis Miller

The Presidency of the OZ DOMOV – DÚHA met twice in person in 2025

And a little :

- 7 members
- 2 honorary members
- 13 employees
- 3 external collaborators

3. KS RAINBOW - mission

Founder: Civic Association DOMOV – DÚHA.

Objective:

To operate a year-round, all-day crisis center for children and children with mothers with a capacity of 24 beds. Childcare is provided in accordance with the Act on Social and Legal Protection of Children and Social Guardianship No. 305/2005 Coll.

Location:

The DÚHA Crisis Centre is located in the premises managed by the Ministry of Labour and Social Affairs on Stavbárská Street No. 6, in Bratislava – Vrakuňa. The lease agreement is concluded until the end of 2025.

Target group:

- Children from 6 to 18 years of age whose upbringing is seriously threatened, whose rights are threatened, minors from dysfunctional families who are reasonably suspected of abuse, sexual abuse or neglect
- Children from 0 to 18 years of age with a parent (mostly mother), whose healthy physical and mental development is endangered by the parent's insufficient parenting skills

Forms of providing assistance:

1. Managing an acute crisis - psychological support
 - Diagnosing an acute crisis
 - Psychological
 - Social
2. Necessary care – accommodation, food, clothing
3. Long-term care for a child and mother with a child
 - Specifically targeted diagnostics
 - psychological
 - Social

- Individual and group therapy
 - Parenting skills training
 - alleviating or influencing the child's behavioural disorders
 - work with the family
 - Improving parent-child relationships
4. Social counseling, social assistance
 5. Educational and therapeutic care focused on the formation of the child's personality,
 6. Provision of education
 7. Provision of health care
 8. Legal advice
 9. Catastrophic monitoring of the client and family

Staffing:

- Director (1)
- operator (1)
- Economist (ext.)
- Educators (5)
- social workers (2)
- psychologists (2)
- housewife (1)

Funds for operation:

- ÚPSVaR
- Grants
- Sponsorship donations and contributions
- Income from clients
- 2% of taxes

4. BZD RAINBOW - mission

Founder: Civic Association DOMOV – DÚHA.

Objective:

Operate a year-round, all-day sheltered facility for women and mothers with children who have been subjected to domestic violence. Capacity of 6 family beds (16 beds). Client care is provided in accordance with Act No. 448/2008 Coll. on Social Services and on Amendments to Act No. 455/1991 Coll. on Trade Licensing as amended

Location:

BŽD DÚHA is located at a secret address to guarantee the safety of clients. The owner of the building is the Bratislava Self-Governing Region and the lease agreement was concluded until 2021 for a symbolic rent. Subsequently, the contract was extended until 2022 – until the end of the sustainability of the project. After the end of the project, BSK repeatedly extends our contract for one year.

Target group:

- Women who have been subjected to domestic violence or have been threatened with domestic violence.
- Mothers with children whose life and health are threatened by domestic violence or have been threatened with violence by a close person living in the same household.

Forms of providing assistance:

1. Managing an acute crisis - psychological support
 - Diagnosing an acute crisis
 - Psychological
 - Social
2. Necessary care – accommodation, help with clothing and food
3. Long-term care of the child and mother with the child

- Specifically targeted diagnostics

- psychological
- Social

- Individual and group therapy

- alleviating or influencing the child's behavioural disorders

- Work with extended family

- Improving parent-child relationships

4. Social counseling, social assistance

5. Educational and therapeutic care focused on the formation of the child's personality

10. Legal advice

11. Catastrophic monitoring of the client and family

Staffing:

1 expert guarantor – PhDr. Dagmar Povodová

1 social worker – Mgr. M.Zbrášová

1 educator – Anna Zelizňáková

1 psychologist – Svitlana Samsonová

1 operator – Mgr. Pavel Povoda

1 lawyer (ext.) – Mgr. Martin Černák

1 economist (ext.) – Ing. Marian Špaček

Funds for operation:

- support for the Norwegian Financial Mechanism (ended in 2017)
- support of the Office of the Government of the Slovak Republic (at the establishment of the facility)
- Contribution of BSK
- subsidy of the Ministry of Labour and Social Affairs
- Grants
- Sponsorship donations and contributions
- 2% of taxes

Information about the project

The Safe Women's House RAINBOW was created thanks to a joint partnership project of the Civic Association DOMOV - DÚHA, the Bratislava Self-Governing Region and the Civic Association Gateway to Life. The establishment of the Safe Women's House DÚHA, as well as its operation until 30.04.2017, was financed from the Norwegian Financial Mechanism - programme area SK-09 Domestic and Gender-Based Violence and the state budget of the Slovak Republic. The non-financing partner of the project is the Norwegian crisis center Glamdal Krisesenter IKS. The aim of the project was to build and operate a safe women's home for women at risk of violence.

The building of the Safe Women's House Dúha was provided to the Civic Association DOMOV – DÚHA by the Bratislava Self-Governing Region. After a complete reconstruction, the building was handed over for use on 15.10.2015. From that date, the elimination of deficiencies and the demanding procurement and purchase of the necessary equipment took place.

The Safe Women's House DÚHA was officially opened on 4.2.2016. The sustainability of the partnership project was five years. Its address is kept secret to maintain the safety of the clients living in it and their children. A safe women's home is a place that provides help to women and children who are being bullied. It meets the minimum European standards of the Council of Europe for counselling and assistance to women experiencing violence and thus creates space for a full life without violence. It provides social services including crisis assistance, accommodation and comprehensive specialized services - crisis counseling, psychological, social, legal counseling and assistance aimed at psychological stabilization and overcoming traumas and barriers.

One of the most important elements of help at the Safe Women's House DÚHA is to ensure safety, protection and support. As part of the assistance, it creates conditions outside the facility for work activities, school attendance for minor children who are in a facility with a person at risk, education and vocational training. It is a specialized type of support and protection providing immediate and safe accommodation for women experiencing violence and their children, in which they can live without fear of further violence. A key element that the Rainbow Women's Safe House provides to women and their children is the empowerment to take control of their lives. Women and children who live in the Safe Women's House should regain the lost sense of living their lives in safety.

5. The year 2025

The year 2025 was marked by our 20th anniversary – taking stock of activities and preparing a meeting with co-workers, colleagues, sponsors and supporters, which we planned before the end of the year. However, due to the widespread flu infection, we have postponed this meeting to next year.

Our cooperation with the Central Office of Labour, Social Affairs and Family and with the Bratislava Self-Governing Region has been carried out in the usual "tracks", which we evaluate extremely positively in terms of saving time. We had a problem with the implementation of supervisions, as our long-time supervisor fell ill and meetings with her could not be carried out for a long time. We started looking for a crowd, which we finally succeeded in the fall. Although there were only two joint supervision meetings, we supplemented the need for employees with the possibility of individual supervision meetings, which the employees also took advantage of.

In the past, we rather rejected students who were allowed to complete professional practice due to understaffing and lack of time. Last but not least, due to the elimination of the increased risk of infection of children with respiratory diseases, which has repeatedly happened in the past.

The volunteer program – **My Buddy** has been operating with us for 5 years. And it works very well. Great friends regularly contact their charges, visit them in person, and make a joint program. They give children a piece of themselves, their time, interest, energy, and this is what these children need very much. In the meantime, they have become part of our big family. We appreciate their interest in children, their time and help and we are happy that these friendships have lasted, today we can say - for years.

Our second volunteer program implemented by volunteers **of the Bratislava Volunteer Center** continued in the form of regular tutoring. Hobby clubs have not been renewed this year either, which is related to the age of our children, which is rather higher and children are no longer interested in such activities.

Our cooperation with some foundations and companies has been working for many years. We again participated in the Our Town project, which is organized by the **Pontis Foundation**.

Volunteers from Mondeléz and DHL have been **signing up for this event for several years**, who always help us with the spring landscaping of indoor and outdoor spaces, clean and clean our garden, trim trees and shrubs, mow, paint

garden components and paint the living area of the children. We also cooperated with **the Community Foundation** in the selection of traditional books for children. The Better World Foundation was added, which organized a collection for our facility, from which

we will finance the next year of **the Cooking School** with Mr. Andrej Čierny, who teaches children not only to cook and thus take care of themselves, but also to choose suitable food, buy and economically handle ingredients. This project has been very popular and interested in our children for several years.

We did not participate in the regular collections of clothes of the Pontis Foundation this year either, our needs are fully covered by individual donors.

We received significant financial assistance the following year from **UP Slovakia (UP Dejeunér)**, which repeatedly helps us with the financial coverage of our, so much-needed, legal services for clients in BZD who were exposed to domestic violence. Repeated financial support from **Mercedes-Benz also helped us a lot**, as part of which we slightly improved the equipment of the facility and rewarded the workers of the Safe Women's House.

The following year, the well-established food aid of companies also worked very well: - **LIDL** – regular supply of non-perishable food through the "Share and Help" project – food donation by the general public to alleviate the material need of clients

- Yeme **grocery store** – regular supply of bakery products
- **Healthy food** – a regular gift of lunch menus
- Mr. **Durec** and his regular supply of yoghurts and dairy foods

And it doesn't stop at food aid - the **Kaufland store has** been supplying us with a variety of industrial goods for a long time, which it supports our clients. **Every year, Rhapis** donates flowers and plants to plant in the garden, but this year we also received a beautiful large decorated Christmas tree as a gift. Even though the children already had the tree ready this year, they will enjoy the new tree for several more Christmases. **ZURICH has** repeatedly contacted us with offers of material assistance and donations for clients.

Orange **did not lag behind with help**, which again supported us with a discount on all calling programs throughout the year.

We cannot fail to mention the help of Mr. **Gembický** and his **OZ NAL'ADE**, which offers winter skating to children every year. In addition,

Mr. Gembický regularly monitors our current needs and also helps us with material equipment.

Slovak Philharmonic - its staff They donated to us again

Tickets for several family performances aimed at attracting children to classical music in a playful way from an early age.

St. Nicholas came up with a big **A smile as a gift** under the leadership of Mrs. **Vrábliková** Due to the increased morbidity of young children, St. Nicholas volunteers were willing to go to both facilities and distribute packages to all children. She also contributed sweets to the packages **Mondeléz Company** and donated Advent calendars to children **DHL company**.

There were also Christmas gifts on request from **Siemens, Lidl, Union** and **the Slovak Metrology Institute. The International Women's Club** in Bratislava with **the QSI International School of Bratislava** once again gave children valuable experiences in the form of a visit to the cinema and the Jump Arena, or the New Stage. All the gifts caused great joy among the children, the mothers were touched that someone was thinking of them and enjoyed the joy of their children.

Food for the Christmas dinner for mothers with children in KS and BZD, who are in the greatest need, was donated again by **ELEKTRO A-Z s.r.o. and friends** – WE MUST HELP EACH OTHER.

All together they took care of a beautiful and rich Christmas, gave a lot of joy to the shining eyes. We very much appreciate the moment of belonging and compassion with those who have not been lucky enough in life, to have their own functioning family and caring and loving parents, partners, husbands...

The DÚHA Crisis Centre ended 2025 with a total balance of 63 residential clients – 12 children and 14 mothers with their 37 children. The occupancy rate for the whole year was 94.12% The separate group was busy at 89.07%, the group of children with mothers at 97.73%

Our 2nd facility, Safe Women's House RAINBOW, has been helping victims of domestic violence for 10 years. The facility was 99.58% utilized during the year. This high occupancy rate is caused by the stay of several mothers with many children during the year. BZD provided assistance to 43 clients – of which 16 were women and their 27 children – all victims of domestic violence.

6. Balance sheet of the social section for 2025.

In accordance with the amendment to Act No. 305/2005 Coll. on Social and Legal Protection of Children and Social Guardianship and on Amendments to Certain Acts, we have set aside 1 separately organized group (hereinafter referred to as SUS) with a maximum number of children of 10 and one group for mothers with children with a capacity of 14 people. We provide care to children who find themselves without proper parental care or in an environment that threatens their healthy mental and physical development, and to young adults who have decided to stay in our center after reaching the age of majority and ending institutional care until they finish their studies and become independent. The main goal of social work is to ensure the protection of children's rights and interests, to support their healthy psychosocial development, to create conditions for their successful integration into society and to prepare them for an independent life.

From January 1, 2025 to December 31, 2025, our crisis center – center for children and families provided assistance in the form of a stay **to a total of 63 clients**. These are **12 children** without parents and **14 mothers with 37 children**.

In 2025, we implemented social and legal protection measures for a total of **12 children**, in the residential form for a court decision, of which 1 child reached the age

of majority during the year and subsequently continued in the residential form as a young adult. As a young adult, 1 child was transferred to the agreement from 2025 . By agreement with the parent or the person who personally cares for the child, 1 child was admitted , **8 children** continuously transitioned from previous years and **2** children were newly admitted.

In 2025, we provided care and solved cases of 12 children who were placed in the facility on the basis of:

- urgent action
- educational measure
- court decisions on the ordering of institutional care
- in agreement with the parent or the person who personally cares for the child
- to the agreement on the stay of a young adult.

The reasons for the placement were:

- Neglect of care on the part of a parent - 8 children
- Arrangement with the facility as a young adult- 2 children
- agreement with the parent or person who personally cares for the child - **1** child
- initiative by a child - **1** child

In newly admitted children it is necessary to make a social diagnosis, map the problems of the family, provide psychological care for the child and the closest family, Because the problem of removing a child from its natural environment is complex and burdensome for all involved.

The complexity of the adaptation process requires the cooperation and commitment of all departments of the crisis center - psychological, social and educational. The goal is to create stable conditions for the child and a sense of security in a new environment. It is important to support him in understanding and processing personal and family crisis situations.

The priority of our work with the child and his family is mainly to eliminate the causes that led to the removal of the child from the family. If objective facts allow, the goal of family rehabilitation and the result of our work should be the return of the child to its natural environment. To do this, it is necessary to adjust the conditions, or to remove the signs of neglect of care, which in most cases was the reason for the withdrawal. We map family relationships and the possibility of modifying them. When working with the child and the family, we set a goal and individual tasks. We are trying to correct the problematic behavior of the child, or the problematic relationship with the parent, which was the result of the failure of the educational function of the family. Unfortunately, we have to state that in most cases, the neglect of parental care in the family is so serious that remediation is a long-term process and often does not bring the desired result. Therefore, it is necessary to proceed to the order of institutional care. In this case, our work with the family is focused on maintaining the existing natural family contacts to the widest possible extent. In justified cases, we also contact other family members and close relatives. The preservation of family ties must be in accordance with the elimination of pathological influences from the past and the strengthening of the positive but real perception of the function of the family by the child and also by the parent. However, it is always necessary to communicate flexibly and cooperate with the staff of the ÚPSVaR, the Department of Social and Legal Protection of Children and Social Guardianship and to harmonize the planned steps and procedures.

The cooperation of educators, social workers, psychologists and the exchange of information about behavior, health problems, school results and the overall psychological setting of each child is captured in written plans and interventions. These serve as documents and are in theAn important part of the preparation of summary reports concerning the current situation of children placed in the facility by a court

decision. Mapping the development of the situation, listing all the steps taken to address the client's social situation (education, health condition, cooperation with the family, cooperation with institutions...), this is the information that is then sent to the court, for which it is essential in the decision-making process, or in monitoring the implementation of institutional care.

During 2025, **3 children** ended their stay **in our facility**:

- for 1 child, the agreement was terminated at their own request - young adult
- 1 child has been transferred to another facility on the basis of an educational measure
- for 1 child, the SPODaSK recommendation for an agreement with the parent or the person who personally cares for the child has expired

As of 31.12.2025, 10 children remained in the care and treatment of our facility . Institutional care has already been ordered for 4 children. 2 children were placed on the basis of an urgent measure, 2 children were on an educational measure, 1 child was placed in a separately organized group on the basis of an agreement with the facility as a young adult and 1 child was placed on the basis of an agreement with a parent or a person who personally cares for the child.

In 2025, 40 mothers turned to us ***with a request for accommodation when dealing with their unfavorable life situation***, which is 7 more applicants than last year. Due to the occupancy of beds, we accepted only **11 mothers and their 28 children**.tag. From the previous year, we continuously implemented SPODaSK measures in the residential form **of 3 mothers with 9 children**. Together, we carried out SPODaSK measures **to 14 mothers with 37 children**. The main reasons why we accepted clients into the KS were the need to improve their parenting skills, which in most cases were related to existential, housing or partnership problems.

Clients who are subjected to domestic violence have been given the opportunity to use the services of the Safe Women's House facility, which operates for 2016 and with whom we work closely. This is a serious social problem, the issue of which is gradually opening up to social discussion and increasing awareness

social classes. During 2025, we recommended 11 **mothers with 20 children to the BŽD DÚHA** facility.

The effort of the KS staff is to ***Help as effectively as possible***, the basis of which is crisis intervention, the development of psychological and social diagnostics and the subsequent cooperation of all stakeholders in solving the problem, if the situation requires and allows it, as well as the activation of members of the client's extended family.

In our facility, we provide clients with ***professional counseling and care***, which includes special social counseling, psychological and therapeutic care, as well as special pedagogical counseling for parents of children with behavioral disorders. An important component of working with clients are group meetings and regular community meetings, the content of which is to reassess current problems and find effective solutions. Joint meetings should lead clients to empathy, mutual sharing of problems and also to better adaptability to life in a collective facility that places increased demands on them. Professionally conducted interviews are intended to motivate clients to take an active and responsible approach to problem solving, to understand the need and necessity of setting priorities and rules, which subsequently help them to function more effectively in everyday life.

One of the priority tasks of the social section in the KS facility is ***coordination of a broad social network*** of our clients, consisting of family members, offices of labour, social affairs and family, especially the Department of Social and Legal Protection and Social Guardianship, preschool facilities and schools, children's doctors, courts and the police.

In addition, social workers provided social assistance to mothers in the KS :

- when solving a housing problem and looking for alternative accommodation,
- when communicating with authorities,
- assistance was also needed in handling finances, family management, cooking and childcare,
- when communicating with other family members,
- when communicating with fathers of children – former partners,
- in the placement of school-age children in school or pre-school facilities.

During 2025, the provision of our assistance in the form of residence in KS DÚHA - CDR to **11 mothers with 28 children was completed.**

Mothers ended their stay in our facility for various reasons:

- 4 clients sought help from BZD
- 3 clients went to sublet with a partner
- 1 client got a rental apartment outside Bratislava
-
- 1 client returned to her home
- 1 client left for a separate sublease
- 1 client used the services of another facility with a partner

At the end of 2025, 3 mothers with 8 children were dealt with in the KS in the form of residence.

Interest in the services of the Crisis Center - CDR is constant in the population, even though the receipt of applications fluctuates in individual months of the year. We have a very negative perception of the shortness of the time spent working with the client, which resulted from the amendment to Act No. 305/2005 Coll. However, we see the biggest problem after the end of the provision of SPODaSK measures for clients in our facility. Most often, we have to deal with the dilemma of where the client can move in solving the housing issue, because there are no options for rental apartments at affordable prices for single mothers. There is also a lack of hostels that would accept clients with children, with an acceptable standard of housing quality. Clients are limited by their low income in the alternatives to choosing an independent housing solution, so they have to reconsider their options and plans. Since solving the problems of mothers is a long-term process, unfortunately they also return to such partners who are conflicted, and they would not otherwise return to them if they had a systemic solution to their problem. However, they provide them with at least partial security in providing for the basic need of the family, such as housing. If the client continues to be a single parent and manages to find employment, she has a good chance of living in city hostels or, in the optimal case, of living in a sublease. In exceptional cases, after years of waiting in the waiting list, the client manages to get a rental city apartment, which is a difficult process. In 2024, the generally binding regulations of the Bratislava City Hall for the allocation of
and it seems that this can be a positive impulse for solving housing issues for clients with sufficient income. However, the demanding care of children, when mothers are in many cases on parental leave, are burdened with enforcement proceedings, significantly limiting their ability to get a job and thus achieve sufficient income to ensure such an important part of family life as safe housing. Unfortunately, most of our clients also belong to this category.

Prepared by: Mgr. Iveta Zemanová, Mgr. Patrícia Karlíková

7. Administration of the Psychological Section of the KS DÚHA - CDR for 2025

Psychological care for children and young adults

In 2025, we provided psychological care to a group of children and young adults aged 8 to 20 at the Rainbow Crisis Centre – CDR. The reasons for their placement were mainly related to family crises or to serious socio-pathological phenomena that led to neglect of care on the part of parents; in a few cases it was also the provision of care to young adults on the basis of agreement. In the case of newly adopted children, it was initially necessary to alleviate the onslaught of anxiety, helplessness, anger, sadness and to process the separation from the closest family. The children gradually adapted to the new environment, found their place in the group and built new social relationships.

Psychological care was provided in various forms:

- **Individual counselling** with elements of therapy and crisis intervention, aimed at processing emotions and supporting personal development.
- **Group activities** – community meetings and art therapy groups, where children learned to communicate, set boundaries, resolve conflicts and share their own experiences in a safe environment.
- **Psychodiagnostics**, which often pointed out that children came from an unstimulating or even neglectful environment, so their potential was not sufficiently developed.
- **Cooperation with the family system** – where possible, we tried to rehabilitate the family environment and strengthen relationships in order to strengthen a healthy family bond. As part of the family rehabilitation, we also worked with parents whose children were admitted to the KS, with the aim of developing their parenting skills, the ability to set appropriate boundaries, perceive the needs of children and create conditions for the safe return of children home.

For younger children, we supported the development of healthy habits, a stable daily routine and basic social competences. We led adolescents and young adults to responsibility, preparation for a profession and gradual independence. Elements of art therapy allowed them to release tension, learn about defense mechanisms within socialization and strengthen self-expression. Changes in the composition of the group during the year (termination of the stay of one young adult, admission of other children) were reflected in the dynamics of the group, so in cooperation with the education department, we adapted the rules and evaluation to reflect the needs of different age groups and also the way of functioning within the group and social ties. Obtaining information about the real functioning of an individual child in an educational group and in social ties in general is important in setting the goals of psychological work.

Psychological Care for Mothers with Children in KS Dúha – CDR

In 2025, we provided psychological care to mothers and their children accommodated in a crisis center with the aim of developing parenting skills and stabilizing a complicated family situation. After admission to the facility, crisis intervention, gradual stabilization and the creation of a safe space began. The persistent difficulties of mothers were the care and upbringing of children; Individual counseling focused on a more sensitive perception of children's needs, setting boundaries in upbringing, understanding emotional development and finding appropriate educational procedures.

Many mothers developed psycho-social factors that complicated their life situation – disorderly housing, low financial literacy, dependence on a partner or social benefits, poor work habits, lack of motivation, or low self-esteem. They often had psychological difficulties (anxiety or depressive symptoms). In individual meetings, we worked on improving their mental state, resolving partner relationships, processing traumatic events and restoring parental or work competencies.

Psychological care for mothers' children in the center focused on adaptation to a new environment, processing negative experiences and developing cognitive abilities. In the youngest children, we worked on sensorimotor development, about which mothers had little information, and this was reflected in the slowed development of basic motor skills. We supported the children in developing communication skills, the ability to recognize and regulate emotions, as well as in the formation of adaptive forms of behavior.

In addition to individual interventions, we organized community meetings for mothers, where they could share their experiences, provide support and look for their inner resources. These groups allowed them to experience acceptance, learn to give and receive feedback, improve their communication skills, and resolve conflicts in a safe atmosphere. Overall, we focused on strengthening their competencies to handle difficult life situations independently and responsibly.

Final evaluation

The year 2025 was marked by the continuation of stabilization activities in the psychological care of children, young adults and mothers with children in the Rainbow Crisis Center. We continued to strengthen parental competencies, supportive relationships and personal development of our clients. We put emphasis on individual cooperation with families and the rehabilitation of the family environment where possible.

8. Administration of the Education Section

The Rainbow Crisis Centre - Centre for Children and Families has been operating in Slovakia for 20 years. The education section is an important part of the system of care for children placed in our facility. Education plays a key role in providing comprehensive care for children and young people who cannot grow up in their own biological family. The main goal of educational activities is to create a safe, stable and stimulating environment supporting the harmonious physical, mental, emotional and social development of children.

In 2025, we focused mainly on supporting school results, developing personal and social competencies, stabilizing new children after their admission to the facility, general health care, strengthening children's emotional stability, and preparing young adults for independent living.

Educational activities were provided by a professional team consisting of an education coordinator and 4 educators. The employees worked in continuous operation to ensure continuous care for the children. The team of the education department attended methodological meetings where the children's progress was evaluated, individual development plans were updated and current educational situations and problems were addressed. During the year, they participated in supervisions to prevent burnout, manage manipulative behavior, communicate effectively, and mediate conflicts.

The age structure of the children included primary school pupils, secondary school students and young adults preparing to become independent. Each of the children had an individual educational plan focused on health care, education, leisure activities and interests, cooperation with the family and external institutions, social and self-care skills and the specific needs of each child. Educational work plans were regularly evaluated and updated. In some children, it was possible to achieve an improvement in behavior and educational results, an increase in motivation to learn and stabilization of emotional experience.

The educators provided daily preparation for lessons, control of homework, as well as cooperation with class teachers, school psychologists, social pedagogues, educational counsellors and counselling and prevention centres. Throughout the year, individual tutoring of children was provided in cooperation with the Bratislava Volunteer Centre.

Educational activities were not only focused on school duties, but also on meaningful leisure time. Leisure activities are an important tool for preventing risky behavior, helping to improve physical condition, teamwork and building positive social relationships.

The children, in addition to their clubs at school and clubs in the leisure center, regularly went skating and to the Cooking School. The BUDDY program has been a great success in our facility. Children from the age of twelve who have their own BUDDY praise the relationship with him and it brings them a sense of acceptance and belonging, as well as a friendship based on trust and security. They spend their free time with him, do activities together that they enjoy, solve the joys and worries of everyday life together.

Children participated in sports activities (football, floorball, volleyball, basketball, visit to the JUMP ARENA), art activities (creating with academic painter Barbara Prešinská), trips to nature (Železná studnička, Horský park, Vrakun Forest Park, visit to the zoo), participated in cultural events (film performances, Around the World in BIBIANA), visited the transport museum, Bratislava Castle, Slavín and sports events (Mölkky tournament, basketball tournament, floorball tournament, attended a swimming course). The local police prepared a lecture for us on drug prevention. In cooperation with the Local Library, the children participated in the celebration of International Children's Day, lectures on media literacy, demonstrations of canistherapy and bullying prevention. We took part in a workshop at the ranch in Horný Bar. During the summer holidays, the children enjoyed recreation in Senec and 2 sessions of children's camps in Repišť. In the facility, we were surprised and gifted by St. Nicholas, we also enjoyed the Easter, Christmas and New Year holidays.

Within the group at common communities, which were implemented once a week, and also daily at evening communities, we solved current problems and talked about topics that interested the children. Individual interviews focused mainly on managing emotions, anger and aggression, on promoting self-confidence and social competences, on improving conflict resolution skills and on promoting cooperation, belonging and cohesion in the group. The communities were also dedicated to social events in the world, health care, sex education and financial literacy, the use of artificial intelligence, the prevention of substance use and extremism.

Education often cooperates with various institutions, schools, schools and health care facilities. Increased care in health issues must be given especially to new children, who in the past have often been in this regard

neglected. It is also necessary to focus on adaptation to the new environment, integration into the team, learning the rules and house rules of the facility.

We also work with children's biological families. The goal is regular contact between children and their families, if it is in their interest and the situation allowed it.

We paid special attention to young people from the age of 16. We focused on assistance in choosing a profession, training in household management (housekeeping, cooking, cleaning), support in finding part-time jobs and acquiring work habits (active job search, how to write a CV, cover letter, preparation for a job interview).

During the year, we also dealt with problematic behaviour in children in the form of violations of house rules, serious violations of school rules, conflicts between children, lies and disregard for educators' instructions. These situations were solved individually, in cooperation with professional staff and relevant institutions. The goal was not a repressive solution, but an educational effect and prevention of repetition of inappropriate behavior.

The year 2025 in the Rainbow Crisis Center – CDR can be described as stabilized from the point of view of the education department. We have managed to maintain the continuity of educational activities, support the education of children and strengthen their social competences. The main priorities for the next period include the expansion of preventive programs focused on the mental health of children and young people, the systematic preparation of young adults for independent living and the further education of professional staff.

The education department fulfilled its mission with an emphasis on an individual approach, stability and support for each child. Despite difficult situations, we managed to create an environment that provides children with security, acceptance and a chance for a better future. Our work is demanding, but every smile, success or progress of a child is proof of its meaningfulness.

9. Balance of services provided in the Safe Women's House **DÚHA**

In 2025, **10 new clients submitted an Application for accommodation in BŽD DÚHA. There were 10 newly admitted clients in 2025, along with their 17 children.** In total, BŽD DÚHA provided residential assistance to 16 clients and 27 minor children, a total **of 43 victims of domestic violence.** Six clients and 10 children lived in BŽD at the turn of 2024/2025.

All 100% of accommodated clients in 2025 were victims of violence. In the case of 13 clients, it was domestic violence, the perpetrator of which was a partner or husband – the father of the children living with the client in the same household. In three cases, the perpetrator of the violence was another person – the mother's new partner (2 cases), the client's biological son (1 case), with whom she lived in the same household.

Graph 1: Perpetrators of domestic violence committed by clients accommodated in BZD in 2025

Chart 2: Aid provided since the establishment of BŽD DÚHA in 2025

Graph 3: Age composition of mothers accommodated in BZD in 2025

Graph 4: Age composition of children accommodated in BZD in 2025

We are part of a professional network of organizations providing direct support to women experiencing domestic violence as well as difficult life situations and we try to contribute to improving the availability and quality of services provided. We promote an approach focused on the needs and strengths of women who find themselves in difficult situations. The basis of work with the client is respect for the client's individuality, co-decision making and co-responsibility of the client, with an emphasis on preserving her own identity and personal independence.

The most common problems that women come to BZD with are:

- Symptoms of trauma (acute stress reaction, acute stress disorder, etc.)
- Existential uncertainty
- Mood disorders, anxiety disorders, dissocial disorders, personality changes after long-term traumatization,
- Stress related to ongoing investigations, trials,
- Health problems, consequences after an attack or long-term domestic violence
- Absence of sources of support within the primary and extended family,
- Traumatized child, child witness, victim of violence
- Problems in the mother-child relationship

The effort of the work team is to help mothers live their full lives again after experiencing violence. Women and children who live in a safe women's home should eventually regain the feeling that they are living their lives in safety and are able to find solutions to their life situations even without our help. We support their self-confidence so that they can get back on their feet and rely on their abilities.

The entire process of our work with an accommodated client is based primarily on a partnership approach and cooperation between the client and professional staff. The effort of the staff is to provide all clients and their children with fast, targeted and effective

help. The basic pillars are crisis intervention, the development of a safe plan and the assessment of the risk of domestic violence. Subsequent psychological and social diagnostics, setting individual plans for each client and individual counselling support the sense of security and self-development of clients and their children.

BŽD DÚHA actively cooperates with the Bratislava Self-Governing Region, the Bratislava Ružinov District, but also with other departments of social services of individual city districts in Bratislava – ÚPSVaR, with other facilities of similar focus, with centers for children and families, with various offices, doctors, courts...

In our work, we do not forget that any violence against women always has an impact on children living in a relationship full of psychological or physical violence. Children living in these families are often witnesses of violence or victims at the same time. That is why the specialized support and services provided also apply to adequate support for children and provide them with targeted and comprehensive help and support.

In 2025, the social worker provided basic social and legal counselling to accommodated clients, assistance in protecting the rights and legally protected interests of minor children, and social assistance in dealing with various life situations, mainly:

- dealing with the consequences of domestic violence – establishing and ensuring a security plan, filing a criminal complaint and subsequent interrogation and actions related to it, preparing for a court hearing and accompanying a court hearing,
- in the regulation of rights and obligations towards minor children – determination of paternity, entrustment of children to the care of the mother, determination of alimony, determination of the children's reunion with the father,
- in the recovery of unpaid maintenance – filing a criminal complaint, filing an enforcement and applying for substitute maintenance;
- when communicating with authorities, courts, police,
- when looking for a job;
- when looking for a pre-school and school facility,
- when looking for a doctor, solving problems with a health condition,
- when solving a housing problem and finding alternative accommodation,
- assistance in arranging one-off and recurring financial benefits and contributions, or financial and material donations from foundations,

- when dealing with executions, debts, arrears, personal bankruptcy,
- assistance in financial literacy, family management,
- in helping with the development of parenting skills, etc.

An important activity of a social worker is the preparation of individual summary reports concerning the current situation of mothers and their children. Mapping the development of the situation, calculating all the steps taken to solve the client's social situation (education, health status, cooperation with the family, cooperation with institutions, etc.) An important part is the processing of social history. A social worker strives to obtain all available information about the environment, about the atmosphere,

relationships, successes and failures. After the analysis of the infrastructure, emphasis is placed on identifying suitable institutions, organizations that could provide support to the client, or help in eliminating the negative impacts and consequences of the violence experienced.

The address of the Safe Women's House is secret, so all meetings with the family and other interested persons to maintain the secrecy of the address take place in the premises of the Rainbow Crisis Center - a center for children and families.

Emphasis is also placed on regular community meetings, the content of which is to reassess and analyze current problems. They are focused on finding effective solutions, not least constructively guided ventilation of tension and stress under the supervision of professional staff at regular community meetings of accommodated clients.

Out of a total of 16 accommodated clients in 2025, 10 clients left BZD. In 2025, due to the financial unavailability of commercial sublease for single breadwinners, only one client managed to secure her own sublease. Five of the clients had to deal with their situation in another social services facility. For one client, we managed to arrange accommodation with the children at the Kopčany Hostel, which provides temporary rental accommodation. One client returned to her biological family. Despite our efforts, two clients returned to their partners, who mentally and physically abused them in the facility before their accommodation.

Graph 5: Housing solution after leaving BZD in 2025

Most women who seek our services have a disturbed relationship with themselves, low self-esteem and self-confidence due to pathological ties with their partner, but also with their primary family. Therefore, we try to encourage and support their efforts to build a new, stable background, increase their competences to make decisions about their own lives and the lives of their children, and their ability to defend their rights. The greatest satisfaction of our work is when, after leaving the facility, clients share with us their life successes, their joys, worries, or turn to us for advice or express their gratitude for the help they received in the facility in the most difficult moments of their lives.

Psychological care for mothers and their children placed in BZD in 2025

In 2025, at the Safe Women's House DÚHA, we continued to provide individual and group psychological care to mothers and their children who have been exposed to various forms of domestic violence in the past. At the beginning of the stay, it was necessary to calm their fear and uncertainty, stabilize their mental state and help them accept the current situation. Since clients and their children have been experiencing aggressive communication and humiliation for a long time, we have tried to restore their self-confidence and self-esteem as an important step towards reintegration into everyday life.

The fact that the clients lived in a secret place during their stay allowed us to delve deeper into their traumatic experiences from their previous life with an abusive partner and from the period after their abandonment. Many mothers felt anxiety, depressive symptoms, or blamed themselves for not being able to provide a safe family environment for their children. In the psychological sessions, we supported the mothers' ability to distinguish between toxic and beneficial – supportive relationships. Through assertive techniques, we taught them how to keep an appropriate distance in communication, recognize and protect personal boundaries, and eliminate toxic relationships.

When mothers were admitted to the facility, we observed considerable resistance to counseling, also due to being cut off from ordinary society and disrupted social ties. Fear of expressing emotions and a low level of self-reflection is an obstacle to the possibility of receiving support from her own internal resources. Through gradual psychological work, mothers showed interest in coping with their children's educational problems, often resulting from an inappropriate family environment. Together, we focused on improving their parenting skills, understanding children's strong emotions and regulating them. We focused on managing the stress and burden of life in a collective facility. For clients, the "double" care that single-parenthood entails after the breakup of a relationship is still challenging. As part of psychological care, we worked on reconciling several spheres of life – personal (emotional), parental and work. An important area of psychological counselling was the topic of the necessity of inclusion in working life and the difficulty of coping with work duties.

Psychological help for children in BZD focused on processing the current family crisis and adapting to the new environment. The children were overcoming separation from their father and complicated, ambivalent relationships with both parents. Depending on age and needs, we focused on emotional development, school problems, relationships with peers and educational issues in cooperation with mothers. When working with younger children, we used play therapy, storytelling, social skills training, bibliotherapy and drama therapy; Older children had sessions aimed at releasing emotions, strengthening personality and increasing mental resilience.

Report on educational activities in BZD in 2025

In 2025, educational care was provided for 27 minor children in BZD. As in previous years, in 2025 we experienced many new events, experiences that moved us forward. Situations and moments with children who came to our facility taught us to be better and more creative. Not only us, but also children, these situations lead them to gain new knowledge and experience that is necessary for their daily lives. These children have often experienced many sad and traumatic moments that they need to process and gradually come to terms with what they have experienced. It is not unusual when they come from a neglectful and unsatisfactory environment.

Every single child is an individual, and we try to pay attention to them accordingly, provide support, attention, thanks to which they feel listened to, understood and perceive that we accept them as they are. Some children are sad and miss their extended family, others of the children are happy that they have their basic needs provided here together with their mother and do not have to experience stress from traumatic experiences of domestic violence, or they feel that their mother is protected from an abusive partner.

We teach and lead children in BZD to independence and responsibility, to cope with stressful situations, to resolve conflicts that arise between siblings or other children of the facility. We lead them to learn to express their feelings, emotions, accept others as well as their opinions. We strengthen their positive relationships with others, with nature, the environment and, last but not least, with themselves. The priority of the education department is to guide children to manage self-service activities, help their mother prepare meals, maintain order between their belongings, beautify the premises and surroundings.

Another irreplaceable task is our help in educating children. Since they come from different places in Slovakia, in most cases they have to change schools. Here we are helpful in coping with a new environment, integrating into a new group of classmates, getting used to new teachers and overall integration into a new life situation. We place great emphasis on home preparation of children for school, we help them with homework, but with regard to the involvement of mothers in the home preparation of their children, so that they learn to help them, be patient and support the preparation for teaching their children.

Children were led to greater independence and responsibility not only in preparation for school, but we also taught them to take responsibility for their decisions, their ways of resolving conflict or unpleasant situations.

Together with mothers, we worked to improve children's motivation for school duties, grades, extracurricular duties, or to look for solutions to possible problematic behaviors of children at school.

Chart No. 1. Age composition of BZD children in 2025

In all leisure activities, we took into account the age composition of the children, their individual needs, gifts, skills, so that they spend time doing what they enjoy and what they relate to. We made their stay more pleasant with various games, creative and physical activities. Our effort was to lead them to be able to organize their free time on their own and to spend their time in a meaningful way. We also tried to involve mothers of children in the activities, as many lack the ability to play together with their children or create something creatively together with their children. The main goal of involving mothers in the game was to strengthen the mother-child relationship and develop parenting skills and abilities.

Activities in BZD in 2025:

- Birthday parties, name days (making gifts for your siblings, friends, baking a cake),
- Board games and competitions,
- Creative workshops (making gifts for sponsors, friends, teachers at school, napkin technique, origama, painting pictures, making greetings, etc.),
- Sports activities (hula hoop, obstacle courses, scooters, balance bikes, frisbee, jumping kindergarten, etc.),
- Rehearsing dance performances, learning various dances,
- Carnival (masquerade ball, mask making),
- Spring holidays (decoration of furnishings, painting Easter eggs, decorating Easter eggs with various techniques),
- Children's Day (sports competitions of children with mothers),
- St. Nicholas (learning wines, poems, songs, making a thank you note to St. Nicholas),

- Christmas (Christmas decoration of the facility, production of thank you cards and gifts for sponsors, siblings, parents and extended family, baking Christmas cookies, building and decorating the tree, etc.),
- Walks in the surrounding area, and getting to know nature,
- Visits to the surrounding playgrounds,
- Visits to cultural events (cinema, philharmonic, theater),
- A visit to the zoo,
- Afternoon with a fairy tale (reading a fairy tale)

The games focused on the development of fine and gross motor skills, the development of children's vocabulary, correct pronunciation, memory, support of imagination with regard to the age and individuality of a particular child, or children's creative thinking. The development of all these skills and abilities took place not only individually, but also in a group. We led the children to be willing to cooperate with the staff, their siblings, or other children of the facility. We developed children's prosocial feelings and behaviors, empathy for others, a sense of belonging and compassion. Creative workshops and art therapy techniques helped children develop memory, improve concentration, imagination and creativity.

Educational activities were also focused on accepting the set rules and boundaries, communicating, expressing one's feelings, opinions, emotions in an adequate way.

Every day spent in BZD brings something new for the child or for us. Moments spent together teach us to handle different situations and move forward. We believe that every child who spends some time in BZD will take with them not only positive thoughts, memories, but also experience, skills on which they will be able to build in their next life, develop their potential and use it in their next life. It is a pleasure for us when children visit us even after leaving the facility and come to share their joys, worries or achievements.
